

Some people work hard for their money and save it and then some day along comes some slick stranger and they invest their money in some scheme that promises big returns and lose it. It can't be any good or it wouldn't need that man to peddle it.

If you put your money in the Bank it will grow and you'll have it.

Put Your Foot Arch On A Suspension Bridge

OUR ARCH PRESERVER SHOE WILL DO IT

After years of foot suffering many people are now for the first time finding real relief in our Arch Preserver shoes. Scores of methods and devices and shoes have been patented to correct arch troubles and they have gone to all extremes from being a nuisance and a bother to making your foot look little less than deformed, while the foot trouble has been but slightly relieved.

Finally some one used some old fashioned horse sense and happened to think that if a shoe could be made with an arch that duplicated the arch of the foot, and that shoe arch made good and strong, countless cases of foot trouble be remedied.

The Arch Preserver Shoes which we sell contain these patterned-afternature arches or bridges

and your foot arch rests and rides on a little suspen sion bridge whose mission is to support and preserve and keep in nature's way the arch of your foot.
